## ADMIN RECORD

RE: Approval of the final Draft Proposed Action Memorandum (PAM) for the  
Remediation of Polychlorinated Biphenyls.

Dear Mr. Slaten,

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the Division) has reviewed the final Draft Proposed Action Memorandum (PAM) for the Remediation of Polychlorinated Biphenyls. We suggest that the wording in the second paragraph of Section 4.0 be changed to read:

The Department of Energy/Rocky Flats Field Office (DOE/RFFO) will target areas known to have contamination levels greater than 10 ppm PCBs by weight for excavation. This should ensure remaining maximum contamination levels less than the proposed 25 ppm PCB soil cleanup standard. If any verification samples taken after excavation exceed 25 ppm PCBs, additional material will be removed until no verification samples exceed 25 ppm PCB.

Please contact Melani Arai at 692-3415 or myself if you have any questions.

Sincerely,

Joe Schieffelin, Unit Leader  
Rocky Flats Unit  
Hazardous Waste Control Program
